

# Grow your Business on a Strong Foundation

## The Business Challenge

As your business becomes more dependent on computers, you worry more about the consequences of those computers failing. One "down" server can destroy employee productivity for hours or days, leaving you unable to take orders or respond to customers, and can cause your business to grind to a halt. You want to focus on running your business and responding to your customers, not running your computer network.

## Simplified Manageability is the Solution

Your local Intel® Channel Partner Program member can become instrumental in managing your computers for you. Your channel member can offer you the latest Intel®-based servers and PCs equipped with built-in manageability features, pre-installed with management and security software that will allow them to monitor and manage your systems remotely.

## Key Features

- Dual-Core Intel® Xeon® processor-based server with built-in management technology that allows your Intel® Channel Partner Program member to remotely discover, heal, and protect this business-critical asset
- Management software applications that enable remote, automated system management
- Automatic installation of the latest security updates and virus protection software
- Proactive, preemptive replacement of failing components such as an overheating fan
- Choice of operating system environments for a stable, cost-effective foundation
- Dual-Core Intel® Pentium® D processor-based PCs with management agent to allow remote PC health monitoring and management

## Benefits

- **Reduced downtime.** With your channel member monitoring your computers around the clock, you can help reduce the devastating financial impact of computer downtime.
- **Increased peace of mind.** With experts looking after your network, you can focus more time on running your business—and serving your customers.

- **Better protection from Internet dangers.** Your computers will be running the latest virus protection and operating system updates, giving you the assurance that your business-critical systems have up-to-the-minute protection.
- **Lower technology management costs.** Having a channel member manage your technology is a cost-effective alternative to hiring your own hardware and software experts. And, because your solution provider can diagnose and even repair many problems remotely, you pay for fewer service calls.

## Who This Solution Will Benefit

Small and medium-sized businesses that need their data and network to be secure and available around the clock but can not afford to keep computer specialists on staff.

## Trusted Technology Leadership

Intel is one of the most trusted names in computing. Millions of businesses around the world depend on Intel®-based PCs, mobile computers, servers, and software to deliver the performance, dependability, and quality they need to succeed.

*Your Intel® Channel Partner Program member can design an Intel-based solution tailored to your needs, then keep it running around the clock.*
