

**High Performance.
Low Power.
Absolute Perfection.**

Introducing the world's best desktop processor.

The new Intel® Core™2 Duo desktop processor runs up to 40% faster* and up to 40% more energy efficient*. All this packed into smaller and quieter PCs. It's technology you can't beat.

1

High Performance

Download your MP3, watch movies and stream media with the best in digital experience. Intel® Core™2 Duo desktop processor runs up to 40% performance increase vs the Intel® Pentium® D 960 processors. It gives faster overall performance, better multimedia experience and increased realism in gaming.

2

Low Power consumption

The design changes in the Intel® Core™2 Duo processors that improve performance also increase processor energy efficiency by operating at lower frequencies that require less power to run. It is up to 40% more energy efficient as compared to today's high-end Intel® Pentium® D processor 960.

3

Quieter. Cooler. Smaller.

The Intel® Core™2 Duo desktop processor was designed from the ground up for energy efficiency. As a result, it minimizes reliance on cooling fans, consumes less energy, and results in quieter, cooler and smaller desktop units than ever before.

4

Truly high-definition

The Intel® Core™2 Duo processor with the Intel® 965G Express chipset gives you smoother playback on high definition video, sharper picture quality and better color and brightness control - all through a new technology called Intel® Clear Video Technology.

5

Setting up is easy

Easy to set up and connect - This new innovation from Intel allows for unified display connectivity thereby reducing the clutter of multiple cables behind the PC and requiring only a single HDMI connection to your Intel Core based PC, set top box, DVD player and other devices.

For more information on why Intel® Core™2 Duo desktop processors are the world's best overall processors, please visit www.intel.com/core2duo

*Performance based on SPECint*_rate_base2000 (2 copies) and energy efficiency based on Thermal Design Power (TDP), comparing Intel® Core™2 Duo E6700 to Intel® Pentium® D Processor 960. Actual performance may vary. See www.intel.com/performance for more information.
