Subject: gratitude

Dear Mr Anshul Sonak,

I am extremely delighted to extend my heartfelt thanks to u and your team of Intel Teach Program for acknowledging Prerana's contributions in taking forward your teacher empowerment programs.

I wanted to grab an opportunity to express my gratitude and a few words of praise for ur commendable services in empowering teachers and thereby making teaching-learning process more interesting, adventurous and an enjoyable journey. I wanted the audience of Intel Award function(on 10th December) to know "how Intel Teach program" took me from an ordinary classroom floor to the platform of Prerana and made me instrumental in extending ur programs to the schools from nook and corner of the city.

Due to time constraints I was not given time to speak. Anyway I would like to thank u from the bottom of my heart for making me 'what I am today'. I definitely would like to acknowledge ur Yeomen services in empowering us and making our profession more challenging. As long as you launch programs like these u will always find teachers like me support ur noble cause by sharing ur shoulder in carrying the burden of promoting all ur programs.

Quote: 1. "You(Intel) inspired me to join Prerana and inspire others!"

Quote: 2. "The project that I prepared during the training under Intel Teach to the Future Program truly changed my future as a teacher as well as a person. The power and self-confidence that I felt after undergoing that training motivated me to join hands with Prerana, a teachers' forum initiated by Intel. Thus, by being a part of Prerana, my enduring relationship with Intel and the journey of my growth as an educator, a learner and a person began. Today, as a member of Prerana I am instrumental in bringing hundreds of teachers on the same platform and share and inspire them with my teaching-learning experiences. What else can be the proof of my growth than this? I am thankful to Intel for making me what I am today."

With warm regards
Parveen Taj
