- Intel, Novell* Extend Collaboration to Drive Moblin Adoption

CISIS 2009 will be Held on June 18 and 19 in Dalian

With the impact of global financial crisis, the IT industry is now facing huge challenges. Under this difficult situation, CISIS Forum 2009, the Lead Event of China International Software and Information Service Fair 2009, is scheduled for June 18 and 19, 2009, at World Expo Centre, Dalian, China, featuring the theme 'Risks, Opportunities and Growth'.

As an enterprise who is always active in this forum, Intel will participant in CISIS this year as usual. Intel Software & Services Group will bring our bleeding-edge technologies and productions to you. By then, Intel Moblin products, IT management software and SOA productions will come to the exhibition booth and give exciting demonstrations.

Dr. Bob Liang, General Manager of Intel Software & Services Group PRC, and Dr. Honesty Young, Chief Research Officer of Intel Software & Services Group PRC, will also come to the forum, and deliver speeches and sessions to share advanced technologies and ideas of Intel SSG. They will discuss with government officers and global IT colleagues about how to seize the opportunities to achieve constant growth facing the world wide financial crisis.

Intel Software Station, Choose Your Killer App. by CPU

"Intel will be a very good platform. Through it, ISV could promote and sale their applications to hardware vendors. And the hardware vendor could drive the developing of valued-added service and competition on difference through software, services, and solutions. As a platform, IBX has more space for the vendors to develop more customers and clients, and to inspire a more healthy competition model." —Mercedes Ho, director of Developer Relations Division (DRD), Software and Services Group

Intel Software Station (<http://software.intel.cn>) was launched in China. As a software downloading & sharing website officially published in mainland China by Intel, it not only provides high quality software products, but also is committed to building a green & authorized service platform of genuine software for all the costumers in China.

Based on your needs and preference, you can choose the most delicately tailored combination of software packages, according to categories, different CPU platform and different equipment. You can find all software and applications optimized for Intel processors, which were all tested and certificated by Intel. A 25-200% performance improvement is shown in the software after optimization. And Intels online Q&A experts help solve questions and problems for the customers with various needs. Intel Software Station would also make long-term efforts to anti-piracy, anti-virus, and anti-hooligan software.

Intel Software Station is the integrity, security, convenient, cost-effective and breakthrough software platform we build for you heart and soul. Now multiple fancy gifts will be sent if you registered for the website. Click [here](#) to registration. Lear more about Intel® Software Partner Program and Intel® Business Exchange, please visit [here](#).

Intel, Novell* Extend Collaboration to Drive Moblin Adoption

May 7, 2009 - Intel Corporation and Novell* Inc. today announced broad efforts to closely collaborate and encourage original equipment manufacturers (OEMs) and original design manufacturers (ODMs) to adopt Moblin, an optimized open source Linux software platform for enabling rich Internet experiences on Intel® Atom™ processor-based netbooks and other mobile systems.

Intel and Novell* signed an agreement outlining their plan for collaboration. Novell* also announced it will create a Moblin-based product for netbooks that it will take to market to a wide range of OEMs and ODMs. Additionally, Novell* will establish Novell Open Labs in Taiwan to foster the adoption of Moblin and will work with the Taiwan Moblin Enabling Center (MEC), a joint effort of Intel and the Taiwan Institute for Information Industry, to validate designs for Moblin compliance.

Intel launched Moblin in 2007 and incubated the effort until last month when the Linux Foundation became host of the community. Intel continues to contribute key technologies and work with the developer community to advance the effort. Novell* began contributing to the Moblin project last October. Novell's contributions to the Moblin ecosystem include leading the open source development of key operating system features such as window, e-mail and media management.

Intel Launched a New Website Moblin Zone

On April 30, Intel Software & Services Group launched a new marketing site for Moblin developers. It is a complementary site to Moblin.org, whose focus is on the developer community.

MoblinZone is the place for comprehensive marketing materials and information that are keys in developing a Moblin project ecosystem of OSVs, ISVs, OEMs and ODMs. The site, complete with a Moblin project look and feel, is Web 2.0 based, allowing visitors to customize the site to provide them with the content and features they specify. Now it's trilingual (English, Chinese, and French). Please visit [here](#) for more information and take a view of Moblin Zone!

30 day evaluation versions of Intel® Software Development Products are available for free download

You can visit [here](#) to download the 30 day evaluation versions of Intel® Parallel Studio, Threading Analysis Tools, Compilers, Cluster Tools, VTune™ Analyzer, Performance Libraries and some free non-commercial downloads. For High Performance Computing Products, you can get free support during the evaluation period by creating an [Intel® Premier Support](#) account after requesting the evaluation license or visit [Intel® Software Network Forums](#). For evaluating Intel® Parallel Studio, you can access free support via [Intel® Software Network Forums ONLY](#). Please note that the product will cease to function at the end of the evaluation period, and the evaluation license is not renewable.

SSG Training Advance

Training 1

Course : Multi-core Programming
Time : May, 27, 2009
Place : Hangzhou

Training 2

Course : Software Performance Tuning
Time : June, 5, 2009
Place : Shenzhen

Training 3

Course : Multi-core Programming
Time : June, 10, 2009
Place : Shanghai

Training 4

Course : Project Management
Time : June, 17, 2009
Place : Shanghai
