

The Intel® IT Director Dashboard will only install on computers that meet the system requirements below. This version supports Desktop only and notebooks will be configured for monitoring only. Please make sure to run IT Director installer on every PC in your network.

#### Platform requirements

##### Processor:

Intel® Core™ i7 processor Extreme Edition, Intel® Core™ i7 processor, Intel® Core™2 Duo processors, Intel® Core™2 Quad processors, and Intel® Pentium® dual core processors

##### Chipset:

Intel® Q45 Express Chipsets, Intel® Q43 Express Chipsets, Intel® G4x Express Chipsets, Intel® B43 Express Chipsets or Intel® Q35 Express Chipsets.

**NOTE:** Please check the important information before installing IT Director

**Microsoft XP\*** - Please check if you have Microsoft .Net Framework 3.5 by Control Panel → Add or remove program → check for Microsoft .net framework 3.5. Else please download [Microsoft Framework .Net 3.5](#) and install.

**Microsoft Vista\*** - Download the [AMT Hotfix](#) for Vista

#### **Silent Installation for Resellers**

Silent installation mode allows system builders/Resellers to install Intel® IT Director without requiring any further user interaction. The application configuration such as setting up password etc happens when end user starts using the application.

For the silent installation in Windows XP\*, please download the [“dotNetFx35.exe”](#), [“ITDirector\\_Setup.exe”](#) and [“SilentInstallForXP.bat”](#). Put all three files in the same directory, click “SilentInstallForXP.bat” to install Intel® IT Director in silent mode.

For the silent installation Vista, please download the [“ITDirector\\_Setup.exe”](#) and [“SilentInstallForVista.bat”](#). Put both files in the same directory, click “SilentInstallForVista.bat” to install Intel® IT Director in silent mode.

Please click the “Download” below to continue download Intel® IT Director

**English:**

ITDirector\_Setup.exe

Ver:1.5

**OS:** Windows Vista\*, Windows\* XP Professional
