

Welcome Message

Anjan Ghosh
Regional Director
Corporate Affairs (Asia-Pacific region)

At Intel we always look forward to this time of the year, with the annual Intel International Science and Engineering Fair (ISEF) showcasing the talent and tenacity of students from across the globe.

Intel ISEF is an opportunity for students from Asia-Pacific to travel to the US to represent their countries, demonstrating the kind of intellect, enthusiasm and innovative thinking that will shape tomorrow's world.

The achievements of our students never fail to amaze me, but in 2011 the performance of the 95 regional representatives was truly outstanding. This year marked one of the strongest performances Asia-Pacific has ever had at Intel ISEF, with our team taking home two of the three major awards and many more of the Grand Prizes.

I would like to congratulate each and every one of the delegates. I hope they will be inspired to repeat these early successes throughout their careers, taking advantage of the infinite opportunities offered through the pursuit of science, technology, engineering and mathematics (STEM).

Outside of Intel ISEF, we continue our committed efforts to transform education across Asia-Pacific. We have a wide range of international programs and local initiatives which seek to bring together educators, governments and not-for-profit organisations to support learners of all ages, in turn driving sustainable economic development. Teachers trained under the Intel Teach program are putting theory into practice and making a real difference in local schools, and we continue to provide classrooms with cutting-edge technology the whole year around. Our people are tireless in identifying ways to make a difference to the communities in which they work and live. I'm proud of their efforts and of the accomplishments of the students we support.

You'll find more details in the newsletter which follows, but I thank everyone involved in these ongoing efforts to build a brighter future.

Asia-Pacific's young innovators shine at Intel ISEF 2011

At the Intel International Science and Engineering Fair (Intel ISEF) 2011, leading young minds from Asia-Pacific delivered their strongest performance in the event's history by receiving 42 Grand Prize Awards, and two of the top three prizes at the event.
